## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 7-8, 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 5419768 to Kayser, and further in view of US Patent No. 6149633 to Maaskamp.

Kayser teaches an apparatus with a first and second conduit; a vacuum source; and a valve having at least two positions, where the valve interposed between the first receptacle and the vacuum source between the second receptacle and the vacuum source. Kayser however does not teach a processor controlling the position of the valve. Maaskamp teaches a flow control system with a processor.

Therefore it would have been obvious to one having ordinary skill in the art to have combined these two teachings, because according to Maaskamp the processor allows for a more precise control of the valve and hence a better control of medical vacuum regulation.

Art Unit: 3763

***Allowable Subject Matter***

Claims 13-14, 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
